

## Lost Card Revealed - Flipped Backwards (2:23)

Easy trick - Effect: Chosen card inserted back to deck, then revealed by performer along with another card when it faces the opposite side then the rest of the deck.

Note: All the manipulation he does to the deck should be done secretly - under the table, or behind your back. They're all very simple and can easily be done without looking.

This was one of the first tricks I learned, and it still works.
