

Aces Card Switch

Effect: The two black aces that the spectator was holding magically turn red!

This trick also has a video tutorial

Preparation

- Set up the 4 aces like this from bottom to top: black ace, red ace, red ace, black ace.
- Place them in top of the deck.

Method

- Lift the top card and show it (black ace). Place that card in the spectators hand.
- Now, TRIPLE LIFT the next 3 cards and show the bottom one to the spectator. It should be a black ace too.
- Next, put all 3 cards down on the deck and take only the top card and give it to the spectator. **MAKE SURE THEY DO NOT LOOK AT THESE CARDS!**
- Now, take the **FIRST** card you gave them and say to them, "So I just gave you another black ace. Right?" And as you say that, point at the card they are holding. As they look down, **QUICKLY** switch the card in your hand and the card that is on top of the deck. If you did it fast enough, there should be no suspicion at all.
- Lastly, Put the card that you have just switched back in the spectators hand. Tell them to flip both cards over and sit back and enjoy the astonishment!

NOTE: THE SPECTATOR MAY NOT LOOK AT THE CARDS AFTER YOU PLACE THEM IN THEIR HANDS. THAT WILL ONLY BE DONE AT THE END OF THE TRICK.
